PREFACE.

THE STUDENT'S DICTIONARY may be described as a general dictionary of the English language, literary, scientific, and technical, etymological and pronouncing, occupying a position intermediate between a mere school dictionary and a bulky lexicon, and forming a handy work of reference for all classes of readers. While its vocabulary embraces all words likely to be met with by the ordinary inquirer, the different meanings are given with some fulness, and care has also been taken to express them with adequate clearness and precision. In its present form, though described as a new edition, it constitutes practically an entirely new work, since not only have all the old articles been thoroughly revised and to a great extent re-written, but many thousands of additional articles have been inserted, while extensive and varied appendices have been added by way of supplementing the information contained in the dictionary proper. The new articles naturally comprise a large number of scientific and technical terms, many of them recently introduced, as well as a variety of other words that the spread of education and the multiplication of books and periodicals have brought into more or less common use. Numerous phrases and idiomatic expressions have also been inserted and explained, the inclusion of these forming one of the features in which the new edition differs from the original. The etymologies—which from their number and completeness may be said to give a distinctive character to the STUDENT'S DICTIONARY—have been entirely recast, so as to bring them abreast of the knowledge which recent investigations have accumulated regarding the etymology of English and the allied tongues. The woodcut illustrations have been much more than doubled in number, thus adding to the attractiveness as well as to the value of the work. Altogether, the STUDENT'S DICTIONARY, in the improved and enlarged form in which it now appears, may claim to be second to no work of reference of similar scope.

C. ANNANDALE.

KEY TO THE PRONUNCIATION.

In showing the pronunciation the simplest and most easily understood method has been adopted, that of *re-writing* the word with a set of letters that have invariably the same *sound*, no matter by what letter or letters the sounds may be expressed in the word whose pronunciation is shown. The *key* by this means is greatly simplified, the reader having only to bear in mind one mark for each sound. Sounds and letters, it must be remembered, are often very different things. In English there are a great many more sounds than letters to represent them, so that some of the letters stand for more than one sound, the letter *a*, for instance, having at least six or seven, namely those given in the accompanying table and other two, as in the words *any* and *quality*, which may be better represented by *e* and *o* respectively. Our alphabet is therefore very far from being a perfect alphabet, which would have a distinct letter for each sound, and would always represent the same sound by the same letter. The following is a list of characters and key-words used to show the pronunciation in the dictionary.

Vowels.

ā,	as in *fate.*	i,	as in *pin.*
ä,	" *far.*	ō,	" *note.*
a,	" *fast.*	o,	" *not.*
ą,	" *fat.*	ȯ,	" *move.*
ą̈,	" *fall.*	ṅ,	" *tube.*
ē,	" *me.*	u,	" *tub.*
e,	" *met.*	u̇,	" *bull.*
ė,	" *her.*	ū,	" *Fr. un.*
ë,	" *Fr. peur*=è long.	ü,	" *Fr. dû.*
		oi,	" *oil.*
i,	as in *pine.*	ou,	" *pound.*

Consonants.

ch,	as in *chain.*	ng,	as in *sing.*
ch,	" *Sc. loch, Ger. nacht.*	TH,	" *then.*
		th,	" *thin.*
j,	" *job.*	w,	" *wig.*
g,	" *go.*	wh,	" *whig.*
n,	" *Fr. ton.*	zh,	" *azure.*

The above system, it is believed, will be sufficient for all practical purposes, and the intelligent reader will not care for greater nicety, and will not be likely to cavil though the vowel sounds in *there* and *fate* (like those in *more* and *note*) are both represented by the same character. Consonants not in the list are used simply with their ordinary sounds.

Accent. — Words consisting of more than one syllable receive an accent, as the first syllable of the word *labour*, the second of *delay*, and the third of *comprehension*. The accented syllable is the most prominent part of the word, and is denoted by the mark ', as in the words *la'bour, delay', comprehen'sion*.

Many polysyllabic words are pronounced with two accents, the primary and the secondary accent, as the word *excommunication*, in which the third as well as the fifth syllable is commonly accented. The accent on the fifth syllable is the primary accent, and when it requires to be indicated in the pronunciation it receives a double mark, thus ", the secondary or inferior accent receiving only the single mark ', as in *excommu'nica"tion*.
